

# REMOTE-CONTROLLED FOR PANTHER VEHICLES

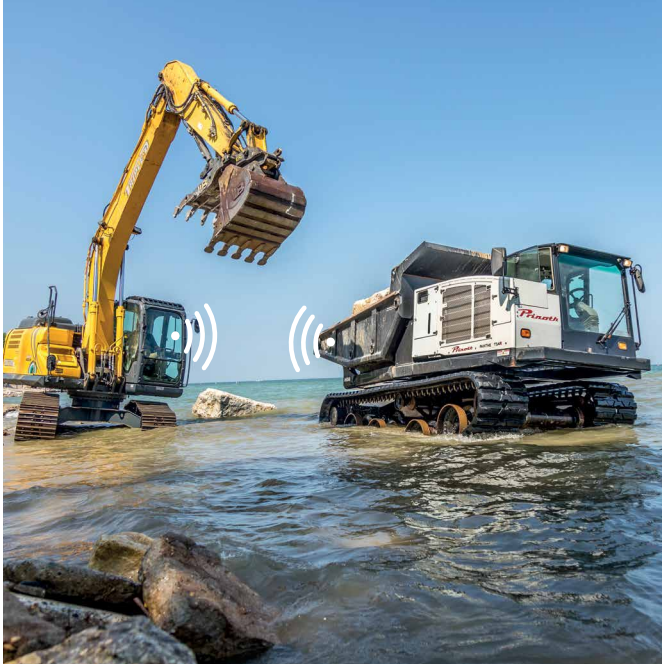

ADDITIONAL SAFETY FEATURE FOR ROUGH TERRAIN

## WORK SAFELY & MINIMIZED COSTS

Remote operation | Multi-tasking | Full day's work

**Pinath**<sup>®</sup>

## FEATURES

Working range: 100 meters (330 ft)

Battery life: 10 hours of runtime before charging

12x LEDs signals: key information about the status of the vehicle and the remote control

Frequency management against interferences

Emergency stop button

2x rechargeable batteries, a charger and a power supply + 12V socket for charging the batteries directly from the vehicle's cabin

## KEEP RUNNING SAFELY

- Enables your Panther to do more: continue your operations without interruption, even when facing less than ideal underfoot conditions, keeping the operator away from risky areas.
- Allows to perform multiple tasks at once and by only one person while giving the operator better visibility from different angles, boosting productivity and reducing costs.
- Improves comfort to operators while also reducing fatigue, removing them not only from hazardous sites, but also from exposure to noise, dust, and vibrations.
- A high battery life capacity enables the possibility of working for an entire day without requiring a recharge.
- The portable lightweight, and ergonomic console is easy to operate.
- Safety device functionalities designed for Prinoth Panthers. to guarantee total protection to your valuable equipment

Note: Remote-controlled operations only apply to the functionalities associated with the original Panther equipment but does not include functionalities related to any attachment from other manufacturers that would be installed on the vehicle.
